EDUCATION

Drexel University | Philadelphia PA | GPA: 3.14

Expected Graduation: June 2028

B.S. in Software Engineering

Relevant Courses: Systems Architecture, Data Structures & Algorithms, Software Project Management, Database Management

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL, C, GraphQL

Frameworks & Tools: Flask, Langchain, React.js, Git/Gitlab, Express.js, Node.js, REST APIs, Redis, MCP, Docker

Development: Agile/Scrum, SDLC, CLI, Bash, JSON, CI/CD, Azure, Helmet, PostgreSQL, GitHub Actions, AWS

Certifications: AI/ML Azure (AI-900), Azure Fundamentals (AZ-900), Security, Compliance and Identity Fundamentals (SC-900)

PERSONAL EXPERIENCE

Comcast | Philadelphia, PA

March – September 2026

Software Engineering Co-op (DevSecOps)

- Developed an LLM-backed security analytics platform surfacing risk pattern, and anomaly insights for organizational leaders and integrated the application to an internal-facing developer portal supporting 30,000+ engineers
- Built a LangChain AI agent integrated with a custom MCP toolset of 5+ tools, enabling real-time retrieval of live security and infrastructure data for automated insight generation and deployed to an internal facing Kubernetes platform
- Architected a GraphQL schema with queries and created an AWS Batch-Job pipeline populating materialized views in a MySQL database, unifying multiple security data sources into a single API layer backing the entire platform
- Operated within an AI-native pod format (distinct from traditional Agile sprints) and presented the application to senior organizational leadership resulting in the decision to integrate the standalone tool into the primary developer platform

Zaro Health | Philadelphia, PA

August 2026 – Current

Product Visionary & Software Engineer

- Contributed to development of iOS App Store launch of Zaro Health's mobile application, worked with a 10-person founding team in a swift moving environment and translated holistic vision into shippable features with rapid delivery rate
- Built a marketing tool custom-tuned for Zaro Health's brand, to automate social media content generation optimized per platforms algorithms reducing marketing turnaround time by 30%, enabling collaboration with social media influencers

AirCast Nasa Space Apps Challenge 2025(Team Relentless) | Remote

October 2025

Full Stack Development (Participant)

- Recognized as top 1,290+ teams chosen from 11,500 for the NASA Space Apps Global Challenge
- Built an AI-powered air quality forecasting platform integrating NASA TEMPO satellite data, OpenAQ and OpenWeather APIs, and an interactive Google Maps/Chart.js interface, delivering 6-hour AQI predictions and geospatial pollutant tracking (NO2, O3, PM2.5); deployed on Azure with automated CI/CD

PROJECTS

LearnFlow-AI | Philadelphia, PA

June – September 2025

Co-Founder & Founding Engineer

- Founded a production-ready AI learning platform serving 150+ beta users, built with React, Electron, and an Express.js backend implementing secure RESTful APIs (Helmet, CORS, rate limiting)
- Built a 6-pipeline context assembly and retrieval system aggregating performance analytics, study materials, syllabus tracking, and session history to power personalized AI content across 10+ concurrent conversation threads per project
- Developed dual capture systems — system-wide OCR (Google Cloud Vision, sub-3s extraction) and real-time audio transcription (OpenAI Whisper) — feeding a unified Supabase schema for cross-feature AI context and notes organization
